Rodrigo López Guerra

CTO | Optimizando operaciones complejas y escalando negocios digitales | Ex-Mercado Libre Director | MBA, Agile , Entrepreneur
Buenos Aires, Buenos Aires Province, Argentina

Summary

It's been 20 years since I wrote my first "Hello World," and while the technology has changed, the magic of solving problems through code remains. Today, that passion has evolved from writing lines of code to building the engineering organizations that write them.

I operate at the intersection of entrepreneurial agility and corporate scalability, having founded my own startups and led Director-level initiatives at massive tech ecosystems like Mercado Libre. I understand the strengths and challenges of both worlds, making me uniquely positioned to help growing companies scale from chaos to structure without losing their soul.

My Leadership Philosophy:

Scale & Culture

- I have grown high-performance teams from 5 to 300+ people.
- I believe you only win when your team wins.
- My role is to create a compelling vision and clear the path for talent to execute.

Execution & Pragmatism

- I focus on getting things done by building resilient architectures.
- I rely on high-quality, data-driven decisions.
- I believe in having a plan but staying agile enough to pivot when reality strikes.

Continuous Growth

- Technology moves fast, so I stay grounded by constantly learning.
- I maintain a "hands-on" mindset to understand the trenches.

- Yes, I still enjoy weekend coding projects with friends to keep the spark alive.

I enjoy meeting new people and hearing new perspectives. Reach out if you want to talk to me about emerging tech, agile, results-oriented models of cooperation, or rugby.

Experience

Mercado Libre

Software & Product Development Director

March 2022 - February 2024 (2 years)

Buenos Aires, Argentina

The leading technology company in e-commerce and fintech solutions in Latin America. Our purpose is to democratize commerce, money and payments to transform the lives of millions of people in the region.
